

As an NAS cyber liability insurance policyholder, you have more than great insurance coverage in the event of a breach. You also have the support of our cyber experts to help prevent the likelihood of an incident. The following provides a brief description of our extensive cyber risk management resources available to you.

CyberNET EXPERT PHONE SUPPORT

Our support hotline is available around-the-clock to handle urgent requests in the event of a suspected breach or to connect you with one of our cyber experts.

Our cyber risk management support team is available to provide guidance and best practices advice related to:

- Implementing policies and procedures
- Creating incident response plans
- Drafting vendor agreements

Our CyberNET experts can be reached 24/7 at 800.973.7343

DATA SECURITY EMAIL UPDATES

Monthly email updates from NAS will help keep you up to date on new federal and state laws and changes to existing laws regarding data security, data breaches, and data privacy issues.

Email 'threat alerts' will also be sent to spotlight time-sensitive security issues, new viruses or other malware that may affect your business.

CYBER RISK WEBINARS

We offer informative webinars throughout the year to help you and your team avoid a breach and to be prepared should a breach occur.

Webinar topics include:

- Federal and state laws that impose data security obligations
- Guidance and tips on compliance strategies
- Avoiding inadvertent disclosures
- Physical and technical safeguards

ONLINE TRAINING AND SUPPORT

Our extensive cyber risk website is continually updated to bring you the latest best practices and tools to help you mitigate data security issues in your business.

Online resources include:

- Employee training courses
- Tips on effective data security practices
- Sample policies and procedures
- Compliance materials by state
- Templates provided to help you implement policies and breach response procedures
